

## **Guinea: WHO statistical profile**

#### **Basic statistics**

| Indicators                                    | Statistics | Year |
|---|------------|------|
| Population (thousands)                        | 11745      | 2013 |
| Population aged under 15 (%)                  | 42         | 2013 |
| Population aged over 60 (%)                   | 5          | 2013 |
| Median age (years)                            | 19         | 2013 |
| Population living in urban areas (%)          | 36         | 2013 |
| Total fertility rate (per woman)              | 4.9        | 2013 |
| Number of live births (thousands)             | 433.9      | 2013 |
| Number of deaths (thousands)                  | 118.1      | 2013 |
| Birth registration coverage (%)               | 58         | 2012 |
| Cause-of-death registration coverage (%)      | •••        |      |
| Gross national income per capita (PPP int \$) | 1160       | 2013 |
| WHO region                                    | African    | 2013 |
| World Bank income classification              | Low        | 2013 |

<sup>...</sup> Data from 2007 onwards not available.

#### Life expectancy (years), 2012

|                         |           | Country | WHO<br>region | World Bank income group |
|-------------------------|-----------|---------|---------------|-------------------------|
| Life expectancy         | At birth  | 58      | 58            | 62                      |
|                         | At age 60 | 16      | 17            | 17                      |
| Healthy life expectancy | At birth  | 49      | 50            | 53                      |

Life expectancy at birth for both sexes increased by 7 year(s) over the period of 2000-2012; the WHO region average increased by 7 year(s) in the same period.

In 2012, healthy expectancy in both sexes was 9 year(s) lower than overall life expectancy at birth. This lost healthy life expetancy represents 9 equivalent year(s) of full health lost through years lived with morbidity and disability.

Healthy life expectancy at birth

Lost healthy life expectancy

#### **Millennium Development Goals (MDGs)**

|   | Statistics |          |
|---|------------|----------|
| Indicators  | Baseline*  | Latest** |
| Under-five mortality rate (per 1000 live births)                              | 238        | 101      |
| Maternal mortality ratio (per 100 000 live births)                            | 1100       | 650      |
| Deaths due to HIV/AIDS (per 100 000 population)                               | 57.9       | 43.9     |
| Deaths due to malaria<br>(per 100 000 population)                             | 195.0      | 103.3    |
| Deaths due to tuberculosis among HIV-negative people (per 100 000 population) | 63         | 27       |

<sup>\*1990</sup> for under-five mortality and maternal mortality; 2000 for other indicators

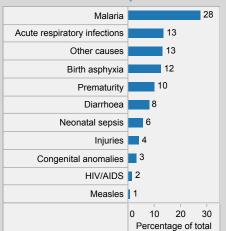

<sup>\*\*2012</sup> for deaths due to HIV/AIDS and malaria ; 2013 for other indicators

# Population using improved water and sanitation

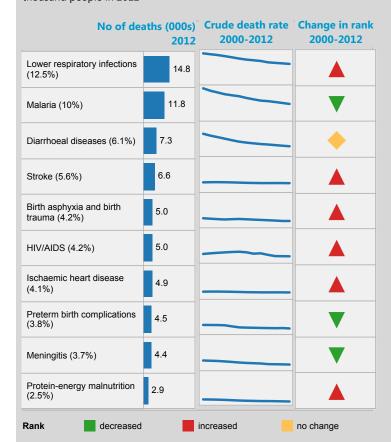

X Improved sanitation facilities

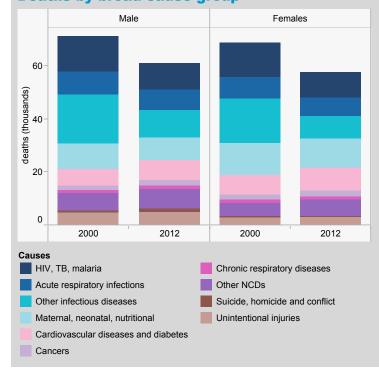

## **Guinea: WHO statistical profile**

#### Top 10 causes of death

Lower respiratory infections was the leading cause of death, killing 14.8 thousand people in 2012

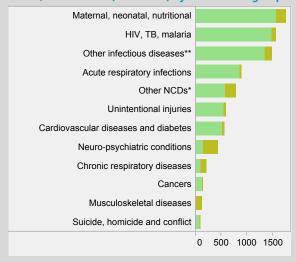

#### **Deaths by broad cause group**

#### **Burden of disease, 2012**

Disability-adjusted life years (DALYs) are the sum of years of life lost due to premature mortality (YLL) and years of healthy life lost due to disability (YLD).

#### DALYs, YLL and YLD (thousands) by broad cause group

\*Other noncommunicable diseases (NCDs) including non-malignant neoplasms; endocrine, blood and immune disorders; sense organ, digestive, genitourinary, and skin diseases; oral conditions; and congenital anomalies.

<sup>\*\*</sup> Infectious diseases other than acute respiratory diseases, HIV, TB and malaria.

#### **Probability of dying, 2012**

Probability of dying between relevant exact ages, for a person experiencing the 2012 age-specific mortality risks throughout their life.

| Before age 15, all causes  | Male          | 35% |
|--|---------------|-----|
|  | Female        | 31% |
| Before age 70, all causes  | Male          | 75% |
|  | Female        | 70% |
| Between ages 15 and 49,<br>from maternal causes                          | Female        | 38% |
| Between ages 30 and 70, from 4 major<br>noncommunicable diseases (NCDs)~ | Both<br>sexes | 21% |

~Cancers, cardiovascular diseases, chronic respiratory diseases and diabetes
